

# KURNELL COMMUNITY UPDATE

Ampol would like to acknowledge the Gweagal people as the Traditional Custodians of the lands where the Ampol Kurnell Terminal is located, and pay our respects to Elders past and present.

## Future opportunities at our Kurnell site

As part of Ampol's Future Energy and Decarbonisation strategies, we are exploring how we can better support our customers, employees, and the communities in which we operate by playing a leading role in Australia's energy transition. This includes looking at how we can better utilise our land and assets across Australia, including our site at Kurnell.

A section of land at our Kurnell site has been remediated over the past four years following the closure of the refinery. A strategic review is being carried out to look at what opportunities exist for this area. The review is in the early investigation stage and may include locating new energy solutions on the site, such as a grid scale battery.

Ampol will ensure that the local community needs, as well as the value of the unique environment and cultural significance of Kurnell, including the national parks and heritage sites, are considered during all stages of this review.

Ampol has proudly been a part of the Kurnell community for 70 years and we value and respect our local relationships. As the review progresses, we will engage and share with the Kurnell community through various forums and provide opportunities to submit feedback and ask questions to help inform our decisions.

Community consultation will be commencing in September.

## Ampol Kurnell Community Fund

We are now accepting applications to the Ampol Kurnell Community Fund which aims to improve local amenities and deliver positive outcomes for the residents of Kurnell.

Community groups and organisations have the opportunity to apply for funding, up to \$20,000, for projects that will be implemented within the next 12 months.

Applications are open from 1 August to 15 September 2023 and are to be submitted online. For more information please visit [www.akcf.com.au](http://www.akcf.com.au)

## Terminal maintenance

We have commenced maintenance of the Retention Basin, located in the north-west area of the terminal. This was initially scheduled for April however works were postponed.

Our contactors will only work when weather conditions are favourable and other measures will be implemented to mitigate impact. We expect work to be finalised by early September.

You may also notice an increase in activity towards the end of the Ampol Wharf over the coming weeks as our contractors carry out inspections and remedial works on underwater assets and pipelines.

## Oil spill response exercise

We recently conducted a joint oil spill response exercise with Port Authority NSW at Bonna Point, Kurnell. The exercise involved five vessels and included the deployment of booms off the beach and groins at Bonna Point.

These exercises are critical to ensure our skills remain up to date, equipment is kept in excellent order and we work closely with key industry stakeholders.

## Community support - Kurnell Public School P&C

We are proud to continue our support of the Kurnell Public School P&C through their Father's Day raffle.

There are some great prizes available and all proceeds go towards improving facilities and purchasing equipment.

To buy tickets, go to:  
<https://rafflelink.com.au/kpsfathersday23>

## Stormwater improvement project

To provide further protection to the community against potential impact from extreme stormwater flows, we are progressing with plans to construct a levee wall around our waste water treatment plant. Other measures will include new pump stations and increased stormwater retention capability.

We will provide updates as the project progresses and work is expected to be completed by late 2024.

## Terminal siren

The terminal siren is sounded in 2 x 10 second blasts to alert Ampol staff and contractors to stop work and proceed to the nearest muster point. Once the "all clear" has been declared, a 10 second blast is sounded, allowing staff and contractors to return to work.

The siren shouldn't be considered as a community siren and residents may not always hear it.

If you would like to receive alerts and notifications from the Terminal in the event of an incident, simply scan the QR code below and complete the online registration form. Alternatively, forms are available at the Kurnell Village Post Office.

## CONTACT US

If you have any questions, feedback, or wish to report a complaint, please contact our community relations team.
